

Supporting Families, Delivering Resources, Connecting Communities.

What we do

Catalyst Community provides support to children, families, and child care providers in several California counties.

What we believe

We believe strong families build strong communities. We empower children, families, and childcare providers through intentional services. We create nurturing environments where children thrive, families feel supported, and providers excel. Together, we build a brighter future for every community.

Our values

Service, Support, Strength

Who we support

Families

Whether families are seeking **help paying for child care** or looking for a **child care referral in California**, we are here to support them. We offer a range of services, including providing basic necessities like **free diapers and school supplies**. We also provide child care, running **Court Waiting Rooms** for parents and guardians attending to legal matters. We connect families with the right resources, from **child care providers** to **educational workshops for parents**.

Care Providers

Whether an existing provider or those interested in **becoming a licensed child care provider in California**, we are here to make their journeys easier with innovative support, professional development, training programs, and essential supplies. We are committed to help providers grow and thrive.

Communities

Building strong, healthy communities starts with ensuring that families and providers have access to the **child care services and support** they need. We collaborate closely with various community partners and government agencies to ensure that resources, such as **affordable child care options, early childhood education support, basic supplies, and training** reach those who need them most. We work to create a network of **community-based solutions** and advocate for improved access to quality care.
