

CAPPA Policy Principles & Goal: Partnering in 2017-18 ***“Children Learning, Parents Earning, Communities Growing”***

The California Alternative Payment Program Association (CAPPA) was created to serve as a voice for low-income working parents and their children to have access to subsidized child care coordinated by community-based and family friendly agencies. Each agency is uniquely positioned to meet the cultural, linguistic and diverse needs of the families in each of California’s 58 counties. We are committed to work in partnership with the California Department of Education (CDE) to provide families with access to the child care and early education programs needed by working parents and to give children the strongest foundation for lifelong learning. To accomplish this, CAPPA will focus on:

Accessibility: Stabilize and increase funding for families to have access to more child care opportunities.

1. Secure funding within Proposition 98 to ensure that the full early care and education needs of children from birth through 13 are coordinated and met.
2. Increase flexible subsidies so that working families have the choice to access care when needed to support the 24 hour/seven day a week requirements of working parents.
3. Establish a Centralized Eligibility List (CEL) to deliver all child care and preschool dollars in partnership with the 40 plus year delivery infrastructure of community based public and private nonprofits.
4. Value all child care and early education providers and centers with rates that recognize the value of their contributions to children, while meeting the financial requirements of operating small businesses as state and local minimum wage increases.

Affordability: Increase provider rates to limit the cost burden for families and reflect the true cost of providing childcare.

1. Use current provider market rate data and update reimbursement ceilings annually to offset the rising cost of child care and limit the cost burden for families.
2. Increase provider rates to reflect the true cost of providing child care and rising minimum wage.
3. Prioritize an increase in the provider workforce that cares for infant and toddlers.

Communities and Partnership: Families and children are most successful when supported by a coordinated network of state, local community and neighborhood stakeholders.

1. Invest in a coordinated support system of public and private nonprofits that believe best outcomes for children, families, and communities occur through strong partnerships and varying areas of expertise.
2. Streamline funding, reduce unfunded mandates, maximize technology and reduce contract barriers in order to create an effective delivery system that values superior operations, program integrity, quality, and maximizes resources allocated in the federal and California child care delivery systems.
3. Provide stable child care for families which in turn provide a stable work force for local employers.
4. Show the data of the working families’ contributions back into the local and statewide economy via taxes through their employment, earnings, and the purchase of child care.
5. Show the data of value of child care provider contributions back into the local and statewide economy via taxes paid as a small business owner, as an employer of staff, and a purchaser of goods.

In order to realize the outcomes noted above, the 2017-18 CAPPA goal is:

To strengthen community based nonprofits created to meet the unique economic, linguistic, cultural and geographical needs of California’s working families’ with the resources to support parents with access to child care and other services needed to remove the barriers of poverty; while supporting a pathway towards self-sufficiency and stability.
